

Risk Management

⇒ Competitive Advantage

Ascend Broking Group
Business Insurance Solutions

A safe workplace means fewer disruptions, safer employees and improved operational performance.

Having an integrated Health and Safety Management System will contribute to the organisation's bottom line effectiveness and overall success.

**Is your organisation getting
an ROI on Health and Safety?**

Ascend Broking Group
Business Insurance Solutions

Our 4 stage approach ensures we deliver the solution that's right for you and your business

Understand issues

Develop a solution

Deliver and implement

Continuous support

We believe risk management is more than just compliance and protection that it can enhance operational performance, build resilience, develop employee engagement and deliver competitive advantage.

We help clients achieve this with our 4 stage approach above, and a combination of our cloud based Health and Safety Management Systems and Consultancy. This enables them to develop and implement the necessary policies, procedures, arrangements and ownership and engagement within the business.

Upgrade your Health & Safety

The BCarm cloud-based Health and Safety Management System enables your business to develop, proactively manage and report on Health and Safety. This gives you peace of mind and claims defensibility with transparency and accountability that can build engagement across the organisation.

- **Flexibility** 75% configured out-of-the-box, the system can be quickly deployed with Risk Assessment templates and Checklist builders, with inbuilt guidance and advice on control measures and H&S arrangements.
- **Business Structure** can be reflected in the system to allow different individuals and locations to access the system for their areas of responsibility, with security around the data and information that is available to them.
- **Accountability** can be created by allocating the different elements of your H&S arrangements across the organisation and track their performance.
- **Proactivity** is created by the monitoring and task management functions, ensuring that H&S arrangements are being maintained and reviewed and shortfalls quickly identified.
- **Management Information** is readily available through the reporting suite, enabling areas with performance issues to be addressed and performance data to be reported on, based on areas of responsibility.
- **Support** is on hand whether it's using the system, implementation or guidance with developing the H&S Management System, with instant access to our Help Desk Team and Consultants.

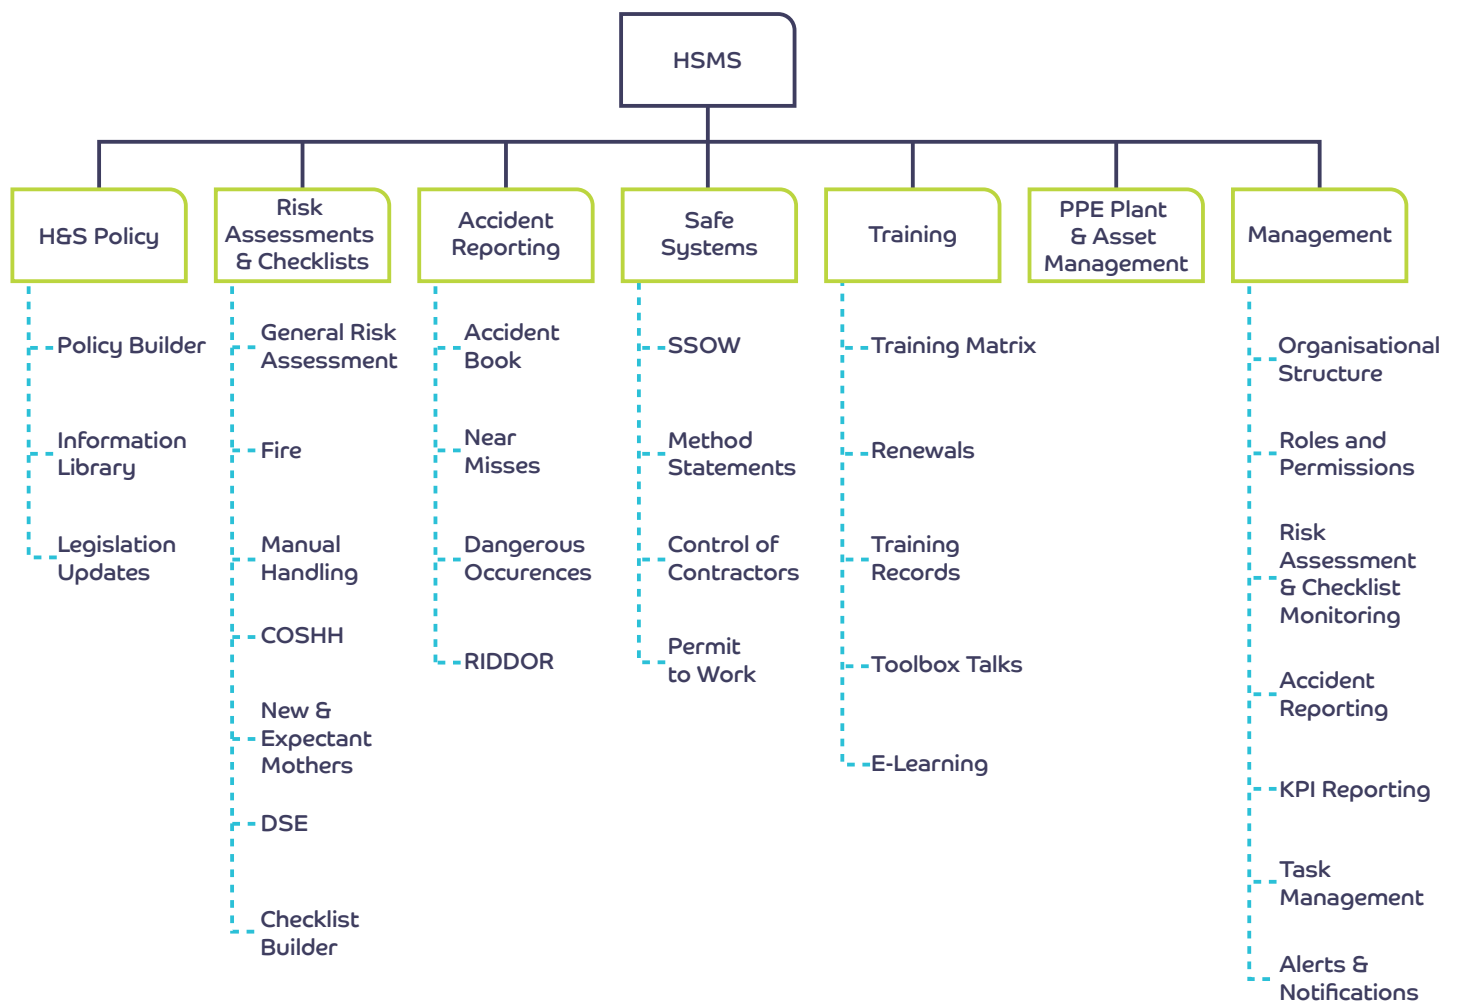

Ascend Broking Group
Business Insurance Solutions

"It's an excellent system; the visibility it's given us across the network, and where we focus now on a daily basis, is excellent, so I recommend it to anybody."

Charlie Benwell
Divisional Operations Manager, Bathstore

Health & Safety Management System

The H&S Management System provides the functionality below that allows risk controls and procedures to be put in place maximising visibility, ownership of tasks and claims defensibility.

E-Learning

- Reduce training costs and training 'down-time' with a flexible E-Learning package that can be adapted to meet the needs of your business.
- Training is a key element of H&S controls and claims defensibility.
- Full reporting on progress across all departments.

BCarm typically provides over 3 hours of training per employee per year, with configurable training plans.

The E-learning will help identify further training needs and risk exposures at an employee level that can then be managed.

Health & Safety Consultancy

We provide onsite Health & Safety Support either on ad-hoc, project or annual support contract basis.

This could include:

- H&S Audit
- GAP Analysis of Risk Assessments
- Development of H&S Arrangements and Control Measures
- Site Inspection Programme
- H&S Committee support
- H&S Management System performance data analysis
- Full reporting on progress across all departments.

To discuss your requirements and how these can be addressed call AscendRisk on 01245 449060 or email info@ascendbroking.co.uk
